Managed Services

The structure of utility invoices is often quite detailed and difficult to understand.

Errors regularly occur which can go unnoticed and unchallenged.

Our specialist knowledge of suppliers' billing systems ensures that any errors or overcharges are identified and costs recovered.

Why are energy bureau services important to my School?

By centralising your schools' energy performance management you can remain assured that costs are reflective of operational outputs and that potential savings will be identified.

What does the energy bureau include?

Our Key Service Includes:

- Invoice verification and checking service
- Retrospective analysis of utility invoices
- Recovery or overpayment of utility invoices
- Verification of correct billing on all current utility invoices

Analysis and monitoring of consumption and costs

- Specialist Energy Management Software
- Monitoring and targeting of consumption
- Tariff analysis
- Analysis of half hourly data and profiling
- Regression analysis
- Budgeting and forecasting
- Benchmarking

Technical help-line

- Advice on billing queries
- Help in understanding and interpreting billing formats and charges
- Advice on good house-keeping practices
- Assistance on where further help and free publications can be obtained.

How will my school benefit?

Our dedicated team uses specialised software and systems to manage all energy information inclusive of: Gas, Water, Electricity, Oil & CRC.

As a result, you will benefit from:

- Recovery of overcharges
- Assurance that the correct utility tariff is applied to the property
- Greater visibility of energy performance for the property
- Improved energy management capability for the portfolio
- Savings initiatives implemented on a business case scenario
- Improved understanding of individual property performance
