

Energy and Sustainable Learning Programme

Safety & Compliance

Energy & Sustainability

Design & Refurbishment

Repair & Maintenance

Managed Services

Our energy & sustainable learning programme helps schools reduce their environmental impact, and minimises the cost of their utility bills.

By getting pupils involved and giving them ownership of the schemes the programme also helps pupils understand the issues around environmental sustainability such as cost, use of resources and environmental impact.

Why is an energy and sustainable learning programme important to my School?

As energy bills increase and budgets are tightened it is more important than ever to be as efficient as possible with our energy and resources.

Giving pupils the knowledge and understanding of the importance of efficiency, and the environmental impacts we have on the planet is crucial to their learning and development.

What does the energy and sustainable learning programme include?

- > Assistance with reducing energy and water consumption, as well as reducing waste going to landfill
- > A dedicated consultant who will visit your site, provide constant assistance as well as being at the end of the telephone if you have any queries
- > Ideas on how to get pupils involved with the scheme, therefore giving them ownership, and allowing them to do their bit
- > Assistance with Eco-schools and the Sustainable Learning programme by preparing information and helping with certification
- > A 6 monthly newsletter keeping you up to date with everything environmental that may affect your school.

How will my school benefit?

- > Getting pupils directly involved in initiatives giving them knowledge and motivation to act sustainably
- > Reduced utility bills mean direct savings to school budgets
- > Improved Display Energy Certificate rating
- > £9 per pupil potential average saving from implementing low and no cost ideas
- > potential savings of over 10 tonnes in CO₂ emissions per year.
