

Statutory Compliance Audit Check

Our free statutory compliance audit will help you to identify any risk which could lead to exposure, a fine or prosecution; providing peace of mind and a safe and secure learning environment.

Managed Services

Why is the effective management of statutory compliance important to my school?

School premises must be maintained in a safe way; and should comply to appropriate Legislation and Associated Codes of Practice.

They are equally used as a reference by the Health and Safety Executive [HSE] to penalise and identify incompetence should an incident arise.

What does a statutory compliance audit check include?

Key features of our service include the delivery of a 'free' diagnostic audit which will review:-

- > all of your statutory compliance services to ensure they are being delivered to meet the required ACOP/British Standard
- > procured services and any gaps in the clarity of the instruction that may currently exist
- > defined roles, responsibilities, addresses and asset/equipment lists

How will my school benefit?

Following a statutory compliance audit, you will be fully informed in relation to:

- > current test/inspection certification status and storage
- > progress of urgent remedial work recommended as a result of prior test/inspections
- > staff competency levels in managing the service
- > competent contractor procurement and monitoring
- > existing audit trails

We will also work with you to assist in the mitigation of any risk and to provide effective systems and procedures to ensure your statutory services are being delivered in accordance with current Legislation and Associated Codes of Practice.
